## FLOWER PASTE WITH TYLOSE & DYOCEL

Knead 100g freshly made Dyocel paste with 200g freshly made Tylose paste.  
Colour and rest as usual.

Mix equal quantities of Confectioners varnish and Cake Decorators fluid in an air-tight container. When required add to any form of dust powder until a good painting consist is achieved. Too much liquid and the "paint" will be transparent - too little and it will be like mud. You will need to add small amounts of the Cake Decorators Fluid from time to time as this evaporates very quickly.
